DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in France on 10 February 2003. It is noted, however, that applicant has not filed a certified copy of the FR0301551 application as required by 35 U.S.C. 119(b).

Response to Amendment

The amendment filed 5 February 2007 has amended the claims and the abstract to provide clarity. Further, a typographical error in the specification has been corrected. No new matter has been added. Examiner's rejections to claims 1-3 under 35 U.S.C. 112 are withdrawn.

The drawings were received on 5 February 2007. These drawings are acceptable.

Allowable Subject Matter

Claims 1-18 allowed.

The following is an examiner's statement of reasons for allowance: the claims are allowable in view of the current claim amendments and the Applicant's arguments. The closest prior art is represented by Kiraly (US 5,467,242). Kiraly teaches a protection device with a timer for monitoring the condition of a power component. However, there is no teaching in the prior art to use a piloting process, wherein successive commutation voltages are applied and each commutation voltage must provide satisfactory operation in a timered period.
